

Project Demo Planning

Date	03 October 2028
Team ID	SWTID-2026-6385
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain the need to restrict record access based on a field value and the limits of standard role-based access	2	Team Lead
2	Solution Overview	Present the architecture: custom table, field, custom role, and script-controlled ACL	3	Developer
3	Setup Walkthrough	Show the table, field, role creation, and the ACL advanced script in ServiceNow	4	Developer
4	Live Demo – Authorized User	Impersonate a user with the required role and show access to restricted records	3	Tester
5	Live Demo – Restricted User	Impersonate a user without the role and show that restricted records are hidden or denied	3	Tester
6	Q&A Session	Answer questions from mentor and reviewers on ACL logic and implementation	3	All team members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Briefly introduce the team and explain the access-control problem being solved
2	Solution Overview	Explain how the script-controlled ACL checks the field value to allow or deny access
3	Live Feature Demonstration	Impersonate users with different roles to show allowed vs. restricted records
4	Q&A Session	Answer questions and note feedback from the mentor
