

Code-Layout, Readability and Reusability

Date	03 October 2028
Team ID	SWTID-2026-6385
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	ACL script uses uniform indentation
2	Proper File Structure	Files and folders are logically organized	Yes	Table, role, and ACLs are organized under one application scope
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Names like answer and branch show their purpose
4	Function / Method Names	Functions are descriptively named	Yes	Script logic is simple and clearly named
5	Code Comments	Inline and block comments explain logic	Yes	Comments explain the field value check and role condition
6	Modular Design	Code is split into reusable functions/modules	Partial	Logic is inside the ACL script; Script Include planned for next phase
7	No Redundant Code	Duplicate or unused code is removed	Yes	No unused code left in ACL scripts
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Access is denied by default if the condition is not met

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Institution Details Table	ServiceNow Table / Dictionary	Used as the protected table for Read, Create, Write and Delete ACLs	Medium
2	Custom Role	ServiceNow Roles	Reused across all ACL operations and test users	High

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
3	Script-Controlled ACL Logic	JavaScript (ServiceNow ACL script)	Same field value check reused in Read, Create, Write and Delete ACLs	High
4	-	-	-	-
5	-	-	-	-

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	4	Clean structure with table, role, and ACLs organized properly
Readability	4	Short, simple scripts with clear conditions and comments
Reusability	3	Logic is reusable across ACLs but not yet moved to a Script Include
Documentation / Comments	4	Comments added for the field value and role checks
Overall Score	4	Good quality; improvement planned through modular scripts
