

Project Executable Files

Date	03 October 2026
Team ID	SWTID-2026-6385
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	NA
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

```
Script-Controlled ACL (Update Set)
/Users          - EEE User (eeeuser@gmail.com)
/Roles          - bb1 (read), bb2 (create), bb3 (write), bb4 (delete)
/Table         - Institution Details (u_institution_details)
/Fields        - Roll No, Student, Faculty, Branch (ECE/EEE/CSE), Email, Phone, Description
/ACLs          - u_institution_details
/Read ACL      - advanced, role bb1, condition Branch is EEE, script
/Create / Write / Delete ACL - roles bb2 / bb3 / bb4 (no condition)
/ACL Script    - admin or bb1 returns true; all others return false
/Sample Data   - records with ECE, EEE and CSE branch values
/Test Results  - impersonation screenshots (EEE User, no role, admin)
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://dev449881.service-now.com/now/nav/ui/classic/params/target/ui_page.do%3Fsys_id%3D92e62f1f97a703100ee3f91de053af16
Login Credentials (Demo)	Mail: yadeshkanna45@gmail.com Password: Rohitsharma@45
Platform / Hosting Provider	ServiceNow Personal Developer Instance (PDI)
Repository Link	https://github.com/Yuvan-hub-web/Script-Controlled-ACL-Restrict-Record-Access-Based-on-Field-Value-
Demo Video Link	https://drive.google.com/file/d/1iBosB4ukbohmmU72xnl-iEukJLq0JKNy/view?usp=sharing

Step 4: Run Instructions

Pre-requisites:

ServiceNow Personal Developer Instance (PDI) with admin role (security_admin elevation) and a modern web browser.

Step 1: Log in to the ServiceNow instance as admin.

Step 2: Go to User Administration > Users and create EEE User (eeeuser@gmail.com). Go to User Administration > Roles and create roles bb1, bb2, bb3 and bb4; assign all four roles to EEE User.

Step 3: Go to System Definition > Tables, create Institution Details (u_institution_details) with the listed fields, and add sample records for each branch.

Step 4: Elevate to security_admin, open System Security > Access Control (ACL) and create the advanced Read ACL on u_institution_details (role bb1, condition Branch is EEE, ACL script).

Step 5: Create the Create ACL (role bb2), Write ACL (role bb3) and Delete ACL (role bb4) on u_institution_details with no data condition.

Step 6: Impersonate EEE User and open u_institution_details.list; confirm only EEE records show and New / edit / delete work. Admin sees all records; a user without the roles sees none.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	The Read ACL script checks roles only; the EEE restriction comes from the Branch is EEE data condition.	Keep the condition active; for stricter control, extend the script to compare the user's branch with the record's Branch field.
2	Create, write and delete need bb2, bb3 and bb4, plus bb1 to see records.	Assign roles cumulatively (bb1 + bb2 + bb3 + bb4), as done for EEE User in the lab.

3	Only the EEE branch is configured; ECE and CSE records are visible to admin only.	Branch-specific roles and ACLs for ECE and CSE planned as a future enhancement.
